The so-called “third-generation” rights to peace and development have not always received a warm reception in the liberal west, having been met with confusion, indifference, and sometimes even outright hostility and derision. More in particular, in the United States of America, the US and many of its allies have continued to foreground the importance of freedom in international human rights law, while issues pertaining to the realization of the right to development have been largely pushed to the margins. Yet in the Global South the moral significance of that Right was increasing. The Right to Development joins other international principles: sovereign equality, self-determination, economic cooperation. In this book the author explains the lack in the implementation of the Right to Development, the history of this struggle and the way to implement this right. The primary purpose of this book is to offer concrete paths for the achievement of alternative priorities to those which currently govern the economic, political, and social arrangements of trade and investment, without any provision for human security and human welfare. Paupp argues that States will be increasingly obligated to formulate policies and programs to achieve peace and development throughout the global society.

A. SAVIN / J. TRZASKOWSKI, *Research Handbook on EU Internet Law*, Edward Elgar Publishing Limited, Cheltenham, 2014, 615 pp., ISBN: 978-1-78254-416-6

In the recent years, the World Wide Web increasingly penetrated social relations. It has created a huge range of unique possibilities due to its convenience, availability and speed. Unfortunately, the electronic network dictates new changes that mankind will have to adapt to. The legal field should rise to this challenge. This work questions if EU law can keep up with changing times and ensure appropriate legal regulation. The *Handbook* delves deeper into the
